Belly Floppers can be Fun

Sometimes they're fatal. Diving in strange waters can end tragically in a shallow pool, on a hidden stump or underwater rocks. Don't let your children do it. Here are a few more "don'ts" that can help them swim safely this summer.

DON'T allow unsupervised swimming. When professional lifeguards aren't on duty, even good swimmers sometimes drown.

DON'T let children go in the water within an hour after eating. It's the surest way to cause cramps. DON'T rely too much on inner tubes or water wings. They give poor swimmers a false sense of security.

A leak causes big trouble.

permit night swimming unless the pool is well lit and well guarded. Once someone goes under in dark water, it's difficult to find them.

DON'T allow long, ambitious swimming early in the season. Swimmers are out of condition. And cold-water saps strength fast.

Common sense is the best guide of all. That's what we at JCP&L-NJP&L teach in our safety programs. At work and on the road, we put our employees and our neighbors'—safety first.
